20.12.2017 – 01.05.2018

Software developer(Two months as intern)

QtWinSoft, Skopje(MKD)

- Consulting with team leader about current and future changes

Projects worked on:

Internal application for database migrations

Description: Working on a application expected as a tool for migration from one to another relational database.

My role: Querying data from relational databases and creating a model required for storing the necessary data before migrating it to another.

Technologies/products used: C++, SQL, PostgreSQL, MicrosoftSqlServer, MySql, Oracle.

Dial pad application

Description: Working on desktop application which is expected to be a dial pad where the design is built based on properties stored on SQLite database.

My role: Creating models for the design and implementing logic for the building of it.

Technologies/products used: C++, Qt widgets, CSS, QML, SQLite.

06.08.2018 – Current

Web developer

Tech Stack : .NET + Angular

MCA, Skopje(MKD)

- Meetings with the client
- Regular discussion with team leader about current and future changes

Projects worked on:

Website: zenegy.com

Description: Platform which has multiple micro services where the primary functionality is a payroll system that gives the company owner a complete overview of the entire payroll administration and helps employees to have better payroll experience, management and status. The application includes several features making it a fin tech environment.

My role: Making decisions and developing features fully independently on both back end and front end.

Technologies/products used: C#, Angular 6, Microsoft Sql Server, ASP.NET Core, ASP.NET MVC, Domain Driven Design, Entity framework, Unit of Work/ Repository, LINQ, Selenium, CosmosDB, RxJs, NgRx, TypeScript.
